Data-driven Summarization and Synchronized second-screen enrichment of Cycling Races

Using Live and Historical Sports Data to Reinvent Traditional Reporting

Cycling on TV: hot or not?

Professional cycling on TV

Peter Sagan: 'For me cycling is a boring sport, and as a fan I only watch the last five kilometres'

Sagan says he 'doesn't get' why professional cycling believes people want to watch long stages with no action

Going gray: Sports TV viewers skew older

Study: Nearly all sports see quick rise in average age of TV viewers as younger fans shift to digital platforms

THE IRISH TIMES

The cycling boom: How popular is it and is it expensive?

Sport has seen huge increases in participation levels but are the costs prohibitive?

Mon, Aug 12, 2019, 20:00

Social and/or recreational cycling

The Ring of Kerry charity event has grown hugely over the years, so much so that organisers had to put a cap on numbers. Photograph: Nick Bradshaw/The Irish Times

You hear them before you see them. That unmistakable clack . . . clack . . . clack across the wooden floor of a coffee shop on a Sunday morning means only one thing: the cyclists have arrived.

And that sound is only becoming more common as the popularity of cycling increases in Ireland. In the latest Irish Sports Monitor survey, cycling is now only behind exercise (mainly consisting of gym-type activities), running and swimming in terms of participation and Cycling Ireland currently has over 25,000 members. That figure is up from just over 15,000 in 2012 and a huge increase on the 2,000 members of the organisation back in 1980.

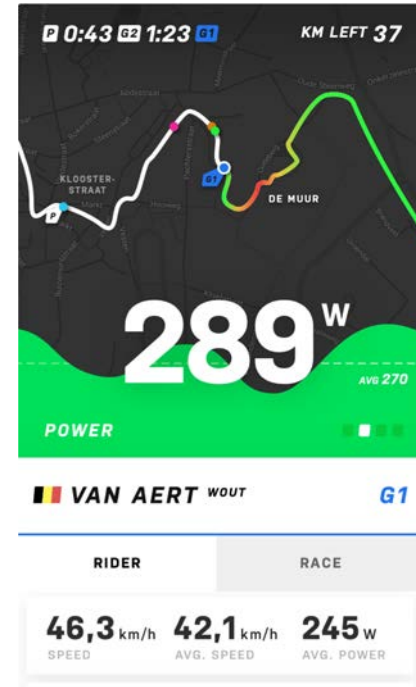

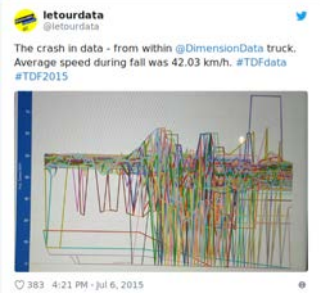

Cycling Broadcasting

- **Weakening interest in watching cycling races on TV**
 - Predictable races (the Sagan, MVdP, Ineos syndrome)
 - Old-fashioned race capturing
 - Younger audience moves to digital platforms
- **Not focussing enough on new technologies**
 - Personalization and interaction can revive cycling broadcasting interest
- **Apart from sponsoring teams cycling on tv has huge undiscovered commercial potential**
 - Tourism
 - Heritage promotion
 - Highlighting culinary culture

Cycling technology

- **Internet-of-Things (IoT-devices)**
 - Attach lightweight sensors to a rider's bike, dashcams in follower cars etc
 - Broadcast and process all data in real-time in an open way (e.g. REST apis)
- **Technology is still hardly used, why?**
 - Adequate translation of raw values into interesting narrative elements
 - Detect events (i.e. something happened) based on the “raw” sensor data

“Every race has a lot of hidden stories”

Data- driven cycling

Data-driven analysis and summarization of sport videos

Proposed summarization methodology

0km **DATA-DRIVEN SUMMARIZATION**
based on engagement score, team(s)/rider(s), parcours data and shot detection

1 SENSOR DATA -> ENGAGEMENT SCORING

2 VIDEO DATA (TEAM/PLAYER RECOGNITION) > TEAM STORIES

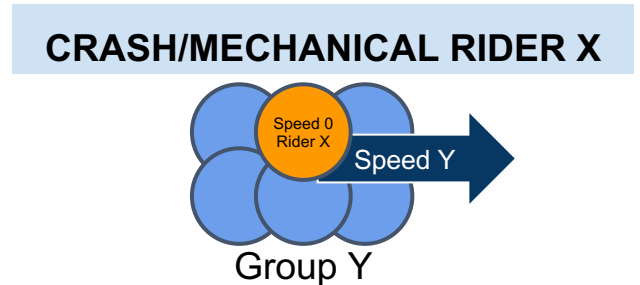

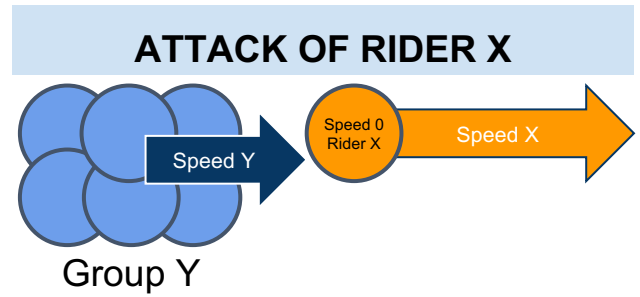

3 PARCOURS + EXTERNAL DATA

 = summary of 8min focusing on high engagement, team/riders shown in red and different segments of the parcours

① SENSOR DATA

- Input from race dataprovider   
- Speed/group-based event detection
 - Detect based on location and speed of a rider compared to median of closest group
 - Check if detected event is impacting race outcome (“moves” in the 5th chasing group might be less important)
- Use event-detection mechanism to find interesting attacks, crashes or moves within a group

② VIDEO DATA

Shot type : motor rear, single rider

Objects :

[cyclist (1), helmet (1), bike(1), bicycle wheel(1)]

Average shot importance score: 2.5

Detected team: Jumbo Visma

Detected text:

7 4,7 km LIVE EUROSPORT.1 HD 131 13 JUMBO 6VISM

Detected rider by text: Primož Roglič

Speed: 22 kph

Location: 53.1234, 3.3445

Heart rate: 177 BPM

Power: 403 Watt

Elevation: 1050m

Grade: +7%

OpenPose pose detection

- **Very useful for detecting the camera angle**
 - Side shot
 - Rear shot
 - Front shot
- **Smart cropping**
 - Numbers can only be found on back, near pelvis
 - Main sponsor mostly on chest area at front

IDLAB team detection

Team Jumbo-Visma 95%

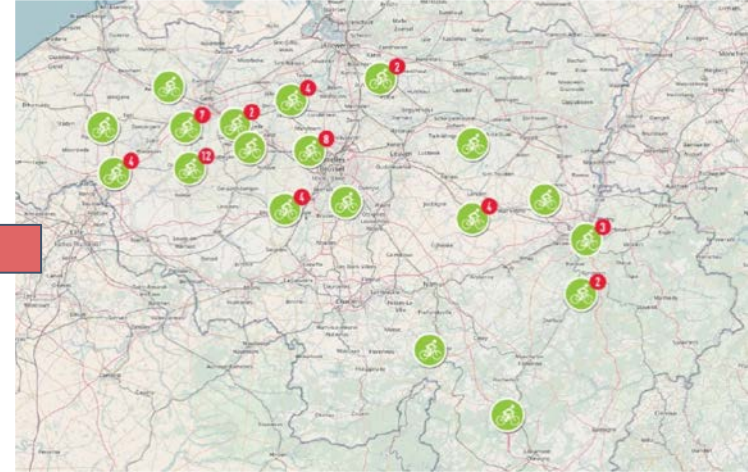

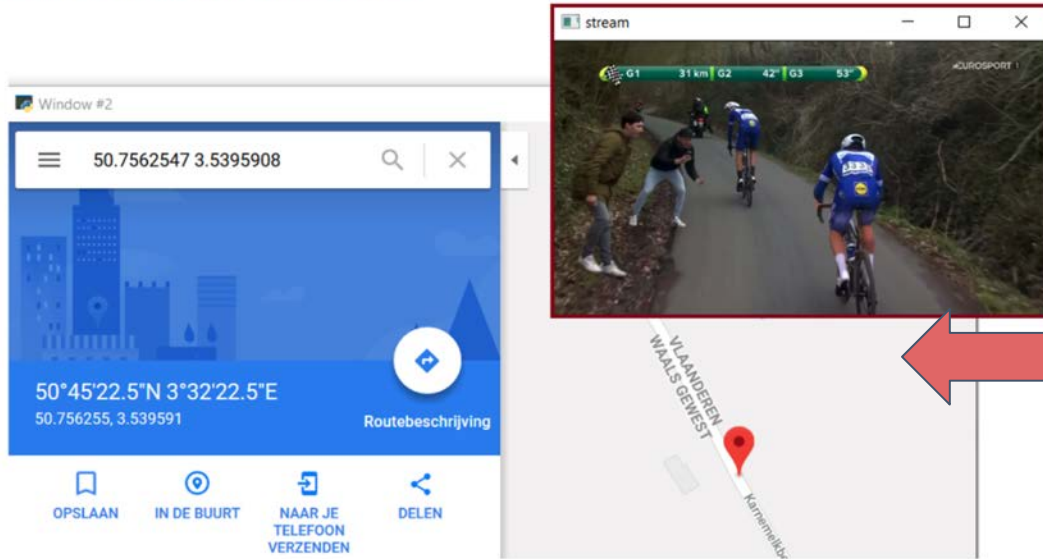

AG2R(0.37 %)
Astana Pro Team(0.18 %)
Bahrain Merida(0.34 %)
Bora - Hansgrohe(0.29 %)
CCC Team(0.30 %)
Deceuninck - Quick Step(0.87 %)
EF Education First(0.07 %)
Groupama(0.10 %)
Lotto Soudal(0.06 %)
Mitchelton Scott(1.55 %)
Movistar Team(0.16 %)
Team Dimension Data(0.63 %)
Team Ineos(0.10 %)
Team Jumbo-Visma(94.77 %)
Team Katusha Alpecin(0.05 %)
Team Sunweb(0.03 %)
Trek - Segafredo(0.06 %)
UAE - Team Emirates(0.07 %)

③ Parcours and external data

Karnemelkbeekstraat, Ronse [50.7562547,3.5395908]

NEARBY CYCLING HERITAGE: (1) Van Wijnendaele Karel | statue

POSSIBLE APPLICATIONS

- Team stories
- Publicity reporting
- Tactical insights

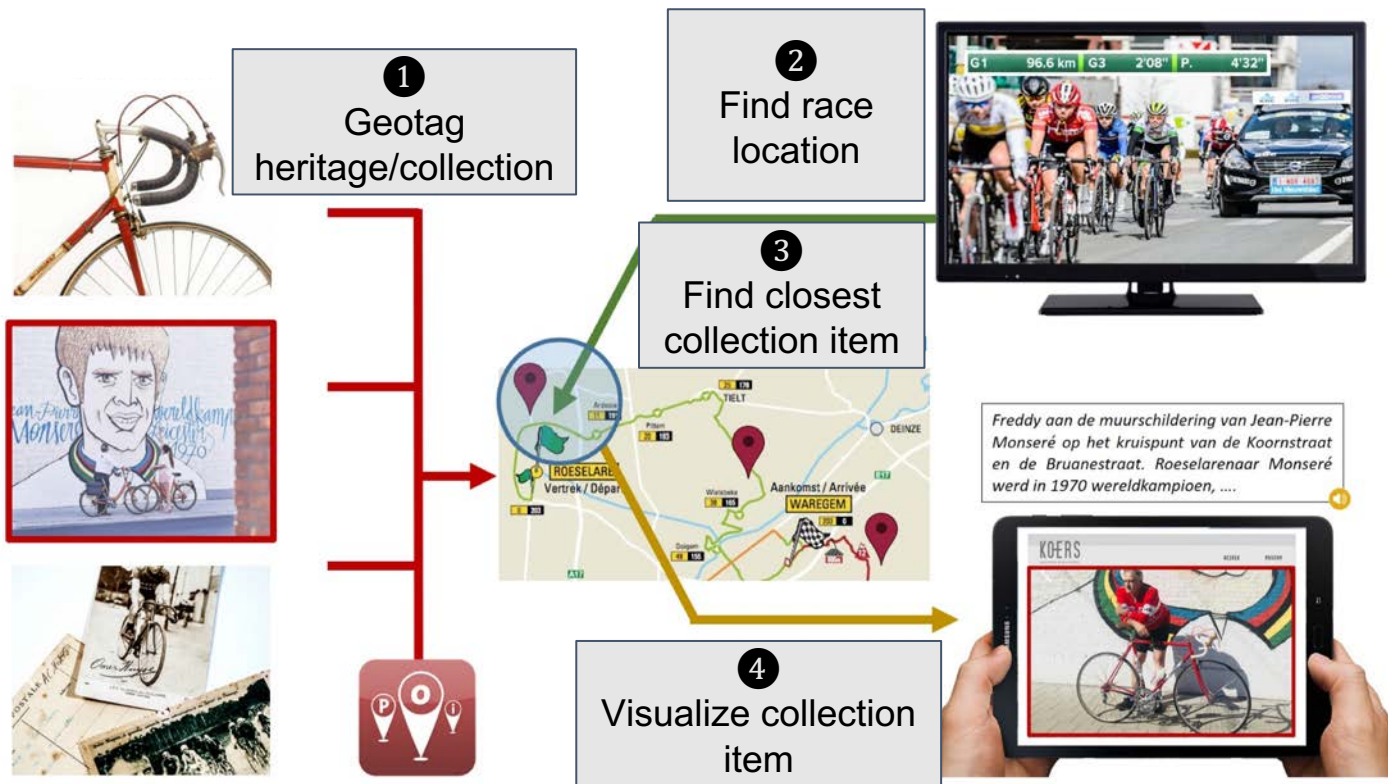

Classica San Sebastian - last 40km - detected teams in footage

Synchronized 2nd Screen enrichment

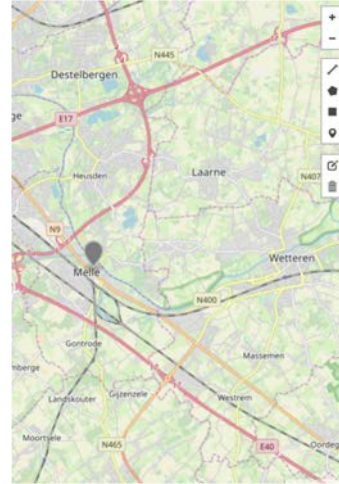

General procedure

1

Geotag heritage/collection

- GeoJSON file of collection
- Themed around certain topic
 - Cycling cafes
 - Cycling monuments
 - Castles
 - ...
- Geospatially indexed features

```

Cycling fan clubs geojson file visualized on <http://geojson.io>

② + ③

Find race location and relevant collection items

- Several techniques can be applied
 - Datastream monitoring (e.g. Gracernote, Velon, ...)
 - Optical Character Recognition on live broadcast combined with race route file
- Find collection items within a certain radius of the current race location

② + ③ FUTURE EXTENSION

Find relevant collection items for team/rider on screen

Using the same **mechanisms** as **broadcast summarization**

Select relevant collection items **based on user preference** and/or **rider/team on screen**

KOERS

GRAND DEPART TOUR DE FRANCE 2019 - BRUSSEL

PREVIEW MODUS

Eddy in Sint-Pieters-Woluwe

AntwerpenGedrukt 1988

„ Anno 1969 is Sint-Pieters-Woluwe, de plek waar Eddy Merckx opgroeide, het decor voor de aankomst van de eerste rit in lijn, verreden in de voormiddag, gevolgd door een ploegentijdrit in de namiddag. In de voormiddag strandt Eddy op een vijfde plek, in de namiddag overklast hij samen met zijn ploegmaats de tegenstand en wint. Daarbovenop pakt Merckx ook nog eens zijn allereerste gele trui! Exact 100 dagen voor de start van de Tour in Brussel, wordt in Sint-Pieters-Woluwe het 'Eddy Merckx Square' ingehuldigd. Een gedeelte van het Goudvinkenplein draagt er sindsdien zijn naam. „
